Profile Summary

Full-Stack Engineer with **3+ years of experience** building production-grade web apps and backend systems using **JavaScript/TypeScript, React, Next.js, Node.js,** and **MongoDB**. Skilled in **REST APIs, microservices, real-time systems,** and **AI-powered workflows** with hands-on experience in **e-commerce platforms, Docker,** and **Agile** environments.

Experience

Devx AI Labs **Feb 2025 — Present**

Software Developer Surat, Gujarat

- Launched an **AI-powered Slack bot** using **LangChain, OpenAI API, and Slack APIs** to automate employee attendance tracking (WFH, leave, late arrivals), serving **60+ employees** and eliminating **5 hours/week** of manual HR tracking, with attendance records stored in **Supabase**.
- Shipped key **e-commerce workflows** on the **Fynd platform Cart, Checkout, and Order Management System (OMS)** wiring **REST APIs** to support reliable order processing and improve checkout workflow stability by **20%**.
- Architected an **AI-assisted development workflow** for the Fynd theme codebase by defining structured **skills, rules, and commands**, enabling developers to safely extend theme functionality while preserving core **e-commerce logic and hook architecture**.
- Built a **command-based AI code review workflow** that validates newly generated components against repository structure and coding standards, providing contextual repository information and reducing **LLM token consumption by 40%** during automated code analysis.
- Designed a **reusable Store Locator plugin** using **TypeScript** and **Medusa.js**, and deployed **Next.js storefront pages** connecting to the **Medusa Admin CMS** for dynamic store and product management while boosting page performance via **React Server Components**.

Webosmotic Pvt Ltd. **Jun 2023 — Jan 2025**

Software Developer Surat, Gujarat

- Architected and shipped a **real-time chat application** using **Redux**, **RTK Query**, and **Socket.io** in **React.js**, enabling seamless communication between **100+ concurrent users**.
- Built a **custom rate limiter** in **Node.js** using **REST API** middleware, improving server stability and reducing abusive request load by **60%** by dynamically blocking excess traffic.
- Crafted a **Stripe Issuing API** dashboard UI, enabling seamless **creation and management of 10+ virtual and physical cards** linked to individual cardholders, simplifying card operations and reducing reliance on manual API workflows.
- Collaborated with backend engineers in an **Agile** environment to deliver a **React.js** dashboard for managing products, invoices, and transaction data, improving operational efficiency by **25%**.

Zechrome Tech. **Sep 2022 — Apr 2023**

Software Developer Surat, Gujarat

- Crafted **10+ responsive user interfaces** using **React.js** and **Chakra UI**, managing application state with **RTK Query** to streamline **API data fetching and caching** across **5+ feature modules**.
- Built backend features by integrating **MongoDB** with **Mongoose ORM**, structuring **5+ schemas** and optimizing database queries to support reliable data management, reducing query execution time by **20%**.
- Improved backend data retrieval by refining **MongoDB aggregation queries** and returning only required fields to the client, reducing **API response time by 30%** and improving overall application throughput.

Webforest LLP. **May 2022 — Aug 2022**

Web Developer Intern Surat, Gujarat

- Delivered **8+ responsive landing pages** using **HTML, CSS, SASS, and JavaScript** for company and client projects, ensuring **cross-browser compatibility** and adherence to design specifications.
- Transformed **3 static websites** into dynamic web applications using **WordPress**, configuring **custom themes and plugins** to meet client content management requirements.

Projects

Fynd E-commerce Storefront — Coach South Africa, EKKE, SuperDry | React.js, JavaScript, Less, GraphQL

- Executed key commerce workflows including **Cart, Checkout, Authentication, and Order Management System (OMS)** modules on the Fynd platform, wiring **GraphQL APIs** to support reliable order processing and dynamic storefront functionality across **3 brand storefronts**.
- Engineered **10+ custom storefront sections and reusable UI components** aligned with brand-specific requirements, ensuring compatibility with the Fynd theme architecture and existing commerce utilities.
- Built an **AI-assisted developer workflow** by defining structured rules, commands, and repository-scoped skills to help AI tools understand Fynd theme hooks, styling conventions, and component patterns cutting onboarding time for new developers by **30%**.
- Designed a **command-based AI review workflow** to validate newly generated components against repository structure and coding standards, improving development consistency and reducing **LLM token usage by 40%** during automated code analysis.
- Enforced **dark theme support and style customizations** across targeted storefront pages to maintain visual consistency with brand design guidelines across all **3 client brands**.

Sift-ai | Next.js, PostgreSQL, pgvector, HuggingFace, Groq, Llama 3.3, Tavily, NeonDB, Prisma

- Architected a **full-stack RAG (Retrieval-Augmented Generation) pipeline** enabling PDF upload, automatic chunking, and conversion to **384-dim vector embeddings** via **HuggingFace all-MiniLM-L6-v2**, stored in **NeonDB with pgvector** and retrieved via **cosine similarity search** to stream grounded, context-aware answers using **Groq Llama 3.3 70B**, reducing hallucination risk significantly.
- Shipped a **Perplexity-style AI web search** feature integrating **Tavily Search API** for live web retrieval and **LLM context injection** to synthesize real-time streamed responses, cutting average research time by **50%** compared to manual search.

Memories App | React-JS, Node-JS, MongoDB, Socket.io, RabbitMQ, MUI, JWT, Vercel, Render

- Built a full-stack social networking platform supporting **CRUD operations**, **JWT-based authentication**, and user interactions (likes/comments), serving **15+ concurrent users** with a responsive **React.js** frontend.
- Implemented **real-time chat and group messaging** using **Socket.io** with event-driven architecture, reducing message delivery latency by **40%** compared to polling-based approaches.
- Architected a **microservices-based backend** (Post, Chat, Mail, User services) integrated with **RabbitMQ** for async task delegation, reducing direct service coupling and improving system fault tolerance by **35%**.

Prompt-O-Verse | Next.js 13, MongoDB, Mongoose, NextAuth.js, REST API, Vercel

- Built a **full-stack prompt-sharing platform** using **Next.js 13** with optimized **server and client components**, achieving faster page loads via **React Server Components** and static generation.
- Integrated **Google OAuth 2.0** authentication using **NextAuth.js**, implementing secure **session management** and protected **REST API** routes to prevent unauthorized data access.

Skills

Languages : JavaScript, TypeScript
Frontend : React.js, Next.js, Redux, RTK Query, Chakra UI, GraphQL, REST API
Backend : Node.js, Express.js, Socket.io, RabbitMQ, Medusa.js, Mongoose, Stripe API
Database : MongoDB, Redis, Supabase, PostgreSQL
AI/ML : LangChain, OpenAI API, Claude Code, Cursor, Windsurf, Codex
Tools : Git, GitHub, Postman, VS Code, MongoDB Compass, Webpack, Vite
Deployment : Vercel, Render, Docker
Practices : Agile, Microservices Architecture, REST API Design, Performance Optimization

Education

B.E in Mechanical Engineering (D2D), Gujarat Technological University, GPA: 8.00/10.00 **Sep 2018 — Jul 2021**
